

Key Features

- Support GPS L1/L2, GLONASS L1/L2, BDS B1/B2/B3 and Beacon frequencies.
- Multi-path rejection board inside can eliminate the multi-path influence to measurement error.
- Adopt multi feed design to ensure the superposition of phase center and geometrical center, and minimize the influence to measurement error.
- Water & dust-proof design ensures absolute seal of kernel parts, capable for long time outdoor operation.

Beacon Antenna HX-CS7615A

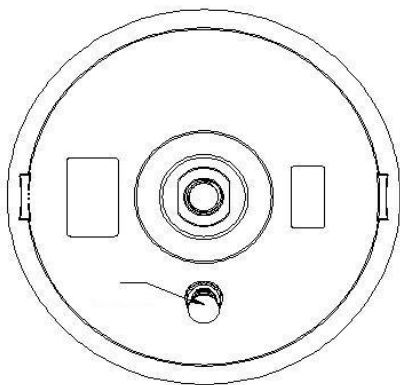

HX- CS7615A receives GPS L1/L2 and GLONASS L1/L2, BDS B1/B2/B3 and Beacon frequencies. This antenna is designed to help maintain tracking of Beacon signals in a challenging environment.

It has high gain and wide beam width to ensure the signal receiving performance of satellite at low elevation angle. The phase center of this antenna remains constant as the azimuth and elevation angle of the satellites change. The assembly consists of weather-resistant materials, which provides consistent performance even at operating temperature extremes. Small and lightweight, featuring 5/8 X11 thread internal mounting for simple installation.
